## Well, Well,

here we are with the largest crop of wheat that we have had for years, so don't forget that you should try and raise a good crop next year, and the way to do that is to buy a Litchfield Manure Spreader and top-dress your wheat ground this fall for a bumper crop the coming season. Also this is the time to do that job of cement work and we have the cement in stock to do it with.

Fertilizer, well I should say so, we have it on hand and more coming.

## "Shepard's Mill Has Burned"

Our flour mill and elevator located on the Smith road caught fire Friday night, August 24, and burned to the ground. The cause of the fire is unknown.

The mill was built in 1872 by the father of the present owners O. C. Shepard, who came here from West Richfield, Ohio. Mr. Reuben Hyde, father of "Rube" Hyde, got out the timber for the frame and Frank Parker, a bridge builder from Richfield, built the frame.

"Pap" Fleagle was the first miller. Joe Noggle who afterwards located in Lodi ran the mill for a number of years. John Warner our fellow townsman was connected with the force in the early days. Judge N. H. McClure worked as an apprentice and learned the miller's trade in the mill immediately after graduating from High School.

O. D. Chapin was the first engineer and ran the engine for 40 years until the engine wore out and electric power was substituted. Wm. Schafer, the present miller, has run the mill for over thirty years.

In the moment of our misfortune the people of the community have been overwhelmingly kind. We have been offered assistance of every kind and from every quarter. A part of the compensation of having a loss like this is in discovering how many friends one has. We deeply appreciate the frankly displayed and kindly interest of our town people in our loss.

Our plans for the future are somewhat vague of course as yet. We hope however to rebuild our plant on the Smith road as soon as arrangements can be made.

For the temporary carrying on of the business of the burned plant would say that we have decided to accept R. O. Bowman's kind offer of the use of his warehouse at the B. & O. depot. And we hope to be in shape to buy and ship out grain from this place within a few days. Notice of this will be given.

We have made arrangements with other mills to manufacture our brand "Magnificent" flour for us so that we will be able to keep our customers supplied as heretofore.

The business of our store on the public square will be very little interfered with by the fire. Everything will go on there very much as before.

We hope within a short time to be able to take care of our customers in every branch of our business the same as before the fire.
